

EQUIPMENT GUIDE

WE PROVIDE EFFICIENT FLAMELESS HEAT AND CLEAN BREATHABLE AIR FOR MULTIPLE APPLICATIONS USING PORTABLE EQUIPMENT TO REMOTE LOCATIONS FOR EXTREME CLIMATE CHALLENGES.

INDUSTRIES WE SERVE

- Agriculture
- Construction
- Custom Projects
- Oil & Gas
- Industrial Plants

At Artic Therm we pride ourselves in our willingness to look at unusual situations and work with the client to provide solutions.

Our many years of heating experience, backed with engineering models, enable us to effectively work out details and requirements for various applications. If you need to heat, chill, replace air, dry, thermally expand, cure or thaw during your next project, let our climate control professionals help you to achieve your goals.

MEET THE HEAT

ATI 500

600,000 BTU
4,500 CFM

The ATI 500 is a self contained portable unit. It's most common use is in Construction Sites, Equipment & Ground Thawing, Emergency & Facility Heating, De Humidifying / Drying and Concrete Curing.

ATI 625

625,000 BTU
4,500 CFM

The ATI-625 is a self contained portable unit with 625,000 BTU output and 4500 CFM airflow. It's designed for medium to large scale heating applications.

ATI 900

1,200,000 BTU
7,200 CFM

The ATI 900 is a self contained portable unit designed for heavy-duty applications. It's most common use is in Construction Sites, Equipment & Ground Thawing, Emergency & Facility Heating, De Humidifying / Drying and Concrete Curing.

BIG HEAT

ATI 2500

2,500,000 BTU

8,500 CFM

Benefits

- Pipeline Integrity
- Reduced Operating Costs & Timelines
- Operates Best in Challenged Environments
- Extended Longevity of Equipment

Applications

- Pipeline Thermal Expansion
- Emergency Thawing
- Power Plant & Pulp Mills
- Facility Applications
- Fresh Air Circulation
- Concrete Curing
- Plant Turnarounds/Start ups
- Vessel / Tank Coat Curing
- De Humidifying / Drying SAGD & Steam Line Applications
- Flood Clean Up
- Ground Thawing

EVOLUTION POWER SOLUTIONS

AN ENTERPRISE GROUP COMPANY

FIELD POWER · WCSB & BEYOND

Reliable field power that replaces diesel — and pays for itself.

Evolution Power Solutions deploys modular turbine microgrids from 333 kW to 7.5 MW+, running on the gas already at your site — wellhead, flare, tank vapor, sour, propane, or delivered CNG. Decentralized, monitored 24/7, and built for Canada's harshest sites.

Book a Site Assessment See the Numbers ↓

- 65+ Turbines deployed
- 99%+ Field uptime
- 3M+ Runtime hours
- 15+ MW Under management
